EVERYTHING YOU
LOVE ABOUT

NATURAL STONE

WITHOUT THE
HEAVY LIFTING

.....

A Natural Stone Product Brought
to you by Connecticut Stone

The line between fantasy and reality
is no longer set in stone. See the
unexpected ways that ThinStone™
natural stone veneer can transform
your life. Custom cuts, innovative
applications and award winning
insight—all under one roof.

*ThinStone™, our 100% natural stone veneer, offers everything you
love about natural stone without the heavy lifting. ThinStone™
is available in over 80 colors and patterns. Designed for both
interior and exterior applications, ThinStone™ is lightweight,
easy to use, and economical.*

WHAT IS THINSTONE™ ?

ThinStone, our 100% natural stone veneer, is designed for both interior and exterior applications.

Benefits

ThinStone’s easy-to-install qualities, interior and exterior diversity, and physical variety lend to its increasing number of benefits. ThinStone is Connecticut Stone’s very own natural stone thin veneer; its light weight allows for a wide range of applications. It not only comes in more than 80 different colors and patterns, but also offers a variety of other benefits that include the following:

- Sustainable and Environmentally Friendly
- Durable Enough for Indoor or Outdoor Use
- Lighter Weight and Easier to Install
- Can Be Custom-Made to Suit Your Project

Standard Cut vs. Custom Cut

Standard Cut ThinStone™ Options:

We offer five standard ThinStone™ cut options: Mosaic, Square Cut, Strip, Ledge, and Rounds. We also make Corners to complement each cut. You can also blend any of these standard patterns for a custom look.

Custom Cut Options

More information on custom cuts can be found later in this brochure.

THINSTONE™ CUSTOM CUTS

Connecticut Stone is happy to offer a wide range of custom options. Learn more about our options below.

Custom Stone Finishes

ThinStone™ can be custom finished to achieve a one-of-a-kind look. While our most popular finish is splitface, we also offer the following finishes:

- Thermal Face
- Honed
- Sandblasted
- Sawn
- Bush Hammered
- Polished

Custom Cut Options

Our production can fulfill any of your custom heights, lengths, and thicknesses. Additionally, you may choose from our standard sawn on one side, unsawn sides, sawn on three sides, sawn on top and bottom, or 5 or 6-side sawn.

Custom Stone Blends

Many of our ThinStone products come with customizable color blends, helping you to create a unique design that is the perfect compliment or focal point of your space.

THINSTONE™ FREQUENTLY ASKED QUESTIONS

ThinStone™ is a great product for residential and commercial projects. Here, we'll answer some of the most frequently asked questions regarding our ThinStone™ product.

How much does ThinStone™ weigh?

On average, it weighs under 15 pounds per square foot.

What's the difference between linear and square feet?

Linear feet is a 12" measurement of length. Length in inches divided by 12 = linear feet.

Square feet is a measurement of area. Length in feet x width in feet = square feet.

How many square feet or linear feet come on a pallet?

ThinStone™ flats have 240 square feet on a pallet. Each pallet has 18 layers and each layer is 13.33 square feet. You are able to order the exact quantity you need even if it means breaking a full pallet. ThinStone™ corners are sold by the linear foot (LF) in 50 LF or 100 LF crates. You can order the exact quantity of corners you need even if it means breaking a full crate.

Is ThinStone™ only available to ship to nearby locations?

Because we have dealers spread throughout the country, we can ship ThinStone™ anywhere in the U.S. and abroad. We offer multiple methods for shipping based on location and the total weight of your order.

Where can I view ThinStone™ locally?

Contact us for the nearest dealer.

Is there a thickness variation on ThinStone™ flats?

Yes, ThinStone™ flats typically range from ¾"-1.5" thick.

Is the stone available in other formats?

Yes. It is available in our standard formats (mosaic, square cut, ledge cut, and strip cut) as well as custom cuts. For more information on the ThinStone™ options we have available, read our blog at www.connecticutstone.com/blog.

How is ThinStone™ installed?

Visit www.connecticutstone.com/thinstone to view our ThinStone™ installation process.

Is there color variation in the material?

Yes. Since ThinStone™ is 100% natural stone, you will see color variation in the material. If you're interested in viewing what we have available, ask a specialist for current lot photos and samples to confirm your selection.

What is the difference between ThinStone™ and cultured stone?

ThinStone™ is 100% natural stone quarried from the earth. It will not fade or disintegrate over time. All ThinStone™ is natural stone, so colors will vary from piece to piece. Cultured stone is a man-made product that is primarily created from cement and pigment. When exposed to sun and harsh weather, cultured stone will fade over time.

What is the difference between building stone veneer and ThinStone™?

The main difference is thickness. Building stone veneer averages 4"-6" in thickness. ThinStone™ averages ¾"-1.5" in thickness. This leads to weight variations and different requirements during installation.

Where is ThinStone™ manufactured?

ThinStone™ is manufactured in the United States – Connecticut, to be exact!

What is the origin of the stone?

We are the originators of ThinStone™. About 98% of our ThinStone™ products are quarried domestically with the majority coming sourced in the Northeast.
