Variation Information

Vihara glass is created through a handcrafted process that embraces the individuality of each tile. A wide range of variation in color, shade and surface texture are to be expected. Surface folds, shallow cracks and minor edge irregularities (including occasional chipped sides/edges) are also natural characteristics of Vihara. **Within a given color, the tones will vary by size/shape, so please reference samples of the actual size desired.**

Samples provided are representative, but may not indicate all variations of these characteristics. Once properly installed, the beauty of this handcrafted glass is enhanced by such variation.
