THINSTONE™

WHAT IS THINSTONE™?

ThinStone™ is Connecticut Stone's proprietary natural stone veneer, fabricated from genuine quarried stone. By cutting full-thickness building stone into lightweight veneer, ThinStone™ preserves the authentic texture, depth, and character of natural stone while expanding where and how it can be used.

Because it weighs only a fraction of traditional building stone, ThinStone™ allows designers and builders to incorporate natural stone into projects that might otherwise require structural modifications. The result is greater design freedom without sacrificing authenticity.

Manufactured in Milford, Connecticut

ThinStone™ is proudly fabricated at Connecticut Stone's Milford facility. Unlike many imported veneer products, ThinStone™ is produced by our experienced fabrication team, giving architects, designers, builders, and homeowners greater flexibility throughout the project.

Working directly with Connecticut Stone means:

- Greater customization
- Consistent quality control
- Reliable lead times
- Project support from start to finish
- One trusted partner throughout the process

THINSTONE™

WHY CHOOSE THINSTONE™?

Natural stone without the limitations of full-bed veneer.

ThinStone™ combines the authentic beauty of natural stone with the flexibility today's projects demand. Whether you're designing a custom residence, updating an existing home, or specifying materials for a commercial project, ThinStone™ provides the look and performance of natural stone in a lighter, more versatile format.

Benefits include:

- 100% natural stone
- Fabricated in Milford, Connecticut
- Available in more than 80 colors and stone varieties
- Endless combinations of cuts, finishes, and blends
- Suitable for interior and exterior applications
- Significantly lighter than traditional building stone
- Easier and more efficient to install
- Ideal for remodeling projects where structural weight matters
- Custom fabricated to meet your project's design requirements

THINSTONE™

ENDLESS WAYS TO MAKE IT YOUR OWN

No two projects are alike, and ThinStone™ doesn't have to be either.

From rustic fieldstone to contemporary linear installations, ThinStone™ can be fabricated to complement virtually any architectural style. Mix materials, combine cuts, specify custom dimensions, or create one-of-a-kind blends tailored to your project.

Available customization includes:

- Standard and custom cuts
- Custom color blends
- Split-face finishes
- Thermal finishes
- Honed finishes
- Sandblasted finishes
- Bush hammered finishes
- Polished finishes
- Custom heights, lengths, and thicknesses
- Multiple sawn edge configurations

If you can envision it, our fabrication team can often produce it.

THINSTONE™ PERFECT FOR NEW CONSTRUCTION & RENOVATION

One of ThinStone™'s greatest advantages is what it makes possible.

Because ThinStone™ weighs only a fraction of traditional full-bed veneer, it can often be incorporated into remodeling projects without the structural demands associated with conventional masonry.

Ideal applications include:

- Fireplace remodels
- Interior feature walls
- Kitchen accents
- Home additions
- Exterior facades
- Outdoor living spaces
- Commercial buildings
- Landscape features

Instead of designing around structural limitations, ThinStone™ gives you greater freedom to focus on the finished design.

THINSTONE™

STANDARD THINSTONE™ CUTS

Connecticut Stone offers five standard ThinStone™ profiles, each available in a wide selection of natural stone colors and blends.

Ledge Cut

Standard Cut | Size: 1" to 4" x 3" to 13"

Depth: 0.75" to 1.25"

Average Weight: 11 to 13 lbs. per SF

Corners: Ledge Cut

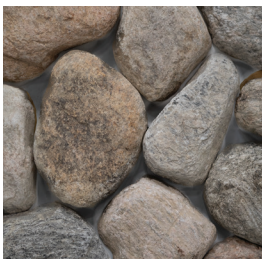

Strip Cut

Standard Cut | Size: 3" x 6" to 6" x 16"

Depth: 0.75" to 1.25"

Average Weight: 11 to 13 lbs. per SF

Corners: Strip Cut

Rounds

Standard Cut | Size: ±5" to 9" diameter

Depth: 1.5" to 2.5"

Average Weight: 11 to 13 lbs. per SF

Corners: Round

Mosaic Cut

Standard Cut | Size: 6" x 6" to 12" x 18"

Depth: 0.75" to 1.25"

Average Weight: 11 to 13 lbs. per SF

Corners: Mosaic

Square Cut

Standard Cut | Size: 4" x 4" to 12" x 18"

Depth: 0.75" to 1.25"

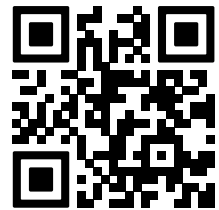

Average Weight: 11 to 13 lbs. per SF

Corners: Square Cut

THINSTONE™ CUSTOM FABRICATION

Connecticut Stone's fabrication capabilities are what truly set ThinStone™ apart.

Our team regularly produces custom stone solutions for projects requiring specific dimensions, edge treatments, finishes, or design details. Whether you need a distinctive contemporary profile or a custom blend that cannot be sourced elsewhere, we can fabricate ThinStone™ to your specifications.

Our in-house capabilities include:

- Custom dimensions
- Custom thicknesses
- Precision sawn edges
- Specialty finishes
- Custom blends
- Project-specific fabrication

THINSTONE™

FREQUENTLY ASKED QUESTIONS

Is ThinStone™ real natural stone?

Yes. ThinStone™ is fabricated from genuine quarried natural stone, not manufactured concrete or cultured stone.

Can ThinStone™ be custom fabricated?

Yes. Connecticut Stone offers extensive custom fabrication, including custom sizes, finishes, edge details, and blends.

Can I combine different ThinStone™ cuts?

Absolutely. Many projects combine multiple profiles to create a one-of-a-kind installation.

Is ThinStone™ suitable for remodeling projects?

Yes. Because ThinStone™ weighs significantly less than traditional building stone, it is often an excellent choice for renovations and remodels where structural considerations are important.

What is the difference between ThinStone™ and cultured stone?

ThinStone™ is 100% natural stone quarried from the earth, offering authentic texture, color variation, and long-term durability. Cultured stone is a manufactured product made primarily from concrete and pigments.
